

# Project-Based Inquiry Science™ CyberPD

---

September 12, 2016

Dear Educators,

Happy start of the 2016-2017 school year! We are pleased to announce a new tool that will help you achieve the goal of implementing *PBIS* successfully: the *PBIS Integrity of Implementation Rubric*. It has been added to the Welcome page of the *PBIS CyberPD* site. You can find the rubric in the "Getting Started" menu. We have also created a document that explains the components of the rubric and describes possible uses.

The *PBIS Integrity of Implementation Rubric* articulates what integrity means in an observable and measurable way. It also identifies and describes seven key components of the *PBIS* approach to teaching and learning. It describes variations for each component of *PBIS* in terms of the actions and behaviors, observable in the classroom, that are Highly Proficient (Ideal), Proficient, Emerging/Beginning, and Needs Improvement.

Your feedback is always welcome. Send your thoughts or comments to: [info@pbiscyberpd.org](mailto:info@pbiscyberpd.org). Have a great school year!

Best,

The *PBIS CyberPD* Team
